Course Summary

- Export certification means FSIS has affirmed that a product meets the export requirements of the receiving country.
- IPP role is to confirm that the 9060-6 satisfies the country's requirements, and safeguard the integrity of the 9060-5 and Export Stamp.
- The 5 basic steps of export certification:
 1. Applicant/exporter submits a 9060-6 and required documentation to an IPP for review and approval.
 2. IPP provides a 9060-5 to the applicant and records its unique serial number.
 3. Applicant submits a completed 9060-5 for IPP review.
 4. IPP issues an Export Stamp; exporter stamps the product.
 5. IPP re-inspects the stamped product, signs the 9060-5, and retains a file copy of the 9060-5 and its documentation.
- Forms and resources commonly used in export certification are:
 - Directive 9000.1
 - Export Library
 - Export Stamp
 - AskFSIS (via the FSIS homepage)
